

# *Space Center Rotary Water Treatment Project*

**Problem: Provide drinking water and job training for a Community**

**Location: Carbonera, Mexico**

## **Solution**

- 1. Establish a bottled water charitable business at the High School**
- 2. Establish a Rotary Interact Club at the High School to operate the business**
- 3. Construct the building, drill a water well, install the process equipment**
- 4. Teach the High School students to operate a business, providing training & options to becoming a fisherman**
- 5. Provide college scholarships from the profits of the business**
- 6. Create a community resource for safe water and vocational training for the children**
