

## Space Center Rotary Donates \$18,000 to the Clear Creek Education Foundation to help fund Bayside Intermediate Lab

Space Center Rotary President David Coney presented the Clear Creek Education Foundation a check for \$18,000 to assist in funding the Bayside Intermediate **Career Exploration Technology Lab** which assists students with synergistic computer modules that provide virtual reality experiences in math, science, technology and engineering careers. It is the largest single donation the Space Center Rotary has made to another organization. Coney believes it is a great fit because "Rotary loves kids."

Coney is a CCISD graduate and has children attending school within the district. He shows the type of passion for CCISD that has helped make it an exemplary district and believes that the donation reflects the organization's commitment to kids, education and the community.

On hand to accept the check on behalf of CCISD and the education foundation were Bayside Intermediate Principal Jamey Majewski (left), Space Center Rotary President David Coney, Clear Creek Education Foundation Chair Lisa Holbrook, and CCISD Superintendent Dr. Greg Smith.
