

Students will power their potential to improve the world and learn the skills necessary to become community leaders through The Commanders Program. Commanders is a week-long summer day program for teens promoting volunteerism in our community. Participating students will have fun as they learn about community service through classroom activities and service projects at local non-profit organizations. The program additionally offers community service hours needed for credit appeal, graduation requirements and college applications. The program is available to students 13-17 years of age.
