

# Our Aid...

## SkyJuice Foundation

As many as 5,000 children a day die as a result of water borne diseases. Contaminated water is responsible for harbouring life threatening diseases such as cholera, typhoid, dysentery and bacteria.

Disaster Aid International is proud to be partnering with the SkyJuice Foundation to provide a long term water solution in our suite of emergency relief products.

Producing up to 10,000 litres of clean drinking water a day, we ensure survivors of disasters have access to clean water as they rebuild their lives.

## Solar-Gem

In any disaster the essential services of electricity and communications can be the first to be lost and last to be restored. Safety and security are paramount for survivors – the Solar-Gem lighting system brings that safety and security for children and women in a camp by providing light.

It also provides support to our DARTs (Disaster Aid Response Teams) as they now have the ability to communicate with the home office.

Whether it be lighting a camp, a school or hospital using our innovative tents, bringing light to survivors is paramount to their safety.

## LifeBox

LifeBox is filled with 75 items of tools, clothing, baby care/hygiene items, toys and six LifeStraws to assist survivors in a disaster.

Dependent upon the area of the disaster, LifeBox can provide additional items such as medical supplies, toiletries nappies etc.

LifeBox is the oldest Rotary approved 'emergency box' with 36 years' experience in delivering disaster relief to survivors.

## disaster aid international

## Bringing all the pieces together.

# Our Aid

Disaster Aid International (Australia, Canada, USA and UK & Ireland) are committed to rebuilding shattered lives by delivering vital emergency shelter, water and light solutions to those who have lost everything in a natural or other disaster.

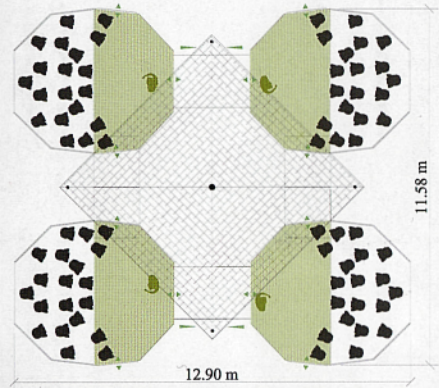

Our Family Survival Pack provides a survivor family with the basic tools to rebuild their lives. All products contained in our box meet and exceed UN and SPHERE standards and have innovative differences.

For ease of transport and manoeuvrability, the box has wheels and a handle. Its capacity is 190 litres, with the lid serving as a carpenter's workbench with two 2"x4" saw grooves, and is completed with a tool holder.

Inside the box is a range of support items, most importantly, the Disaster Aid tent is the largest humanitarian aid tent available. And best of all, it is inter-connectable. Simply, we can erect a four classroom school for up to eighty school children; a hospital or erect a community centre – the deliverables are many and varied dependant on the need of those we serve.

Filled with blankets, water containers, cooking utensils, a stove, pots, pans, children rucksacks (with books and pencils), mosquito nets and other useful items.

We also include pure soap, which according to the WHO helps to alleviate the spreading of disease by up to 70%. Our box of 'hope' helps to rebuild broken lives – with dignity.

School layout for up to 80 children.

# Shelter. Water. Light. = Hope.
